VISION, MISSION & CORE VALUES

Vision

To become a leading industrial scrap management partner in the Saudi Arabia, recognized for compliance, safety, and operational excellence.

Mission

To deliver safe, reliable, and environmentally responsible scrap collection and management solutions that support industrial growth in the Kingdom of Saudi Arabia.

Core Values

- Safety First
- Integrity & Transparency
- Operational Discipline
- Environmental Responsibility
- Long-Term Partnership

Industrial Experience & Project Support

Al Tawakkul for Scrap and Metal Est. possesses operational experience in supporting various industrial activities, including:

- Scrap removal and collection from factories and industrial facilities
- Support for shutdown and turnaround projects
- Structural dismantling and heavy steel management
- Handling of oilfield piping and surplus industrial materials
- Factory and warehouse scrap management

We provide responsive on-site coordination and a structured workflow to ensure operations are executed efficiently without disrupting client activities.

Sustainability & Environmental Responsibility

We are committed to adopting environmentally responsible recycling practices that reduce waste and support circular industrial processes.

Our approach includes:

- Proper material segregation and organized storage
- Prevention of environmental contamination within work sites
- Responsible scrap processing in accordance with approved regulations
- Compliance with Saudi environmental and industrial laws

We believe sustainability is not optional — it is a fundamental part of our operational

Yard Location & Capacity

Logistic Services Dist. - Dammam – Eastern Province – Kingdom of Saudi Arabia

Storage Capacity

Engineered to handle high-volume industrial scrap with organized stacking zones and controlled access points.

Material Segregation

Dedicated and clearly marked sections for:

- Ferrous metals
- Non-ferrous metals
- Temporary holding area for incoming materials
-

Safety & Compliance

Strict PPE enforcement for all personnel and visitors.

Site operations follow regulated stacking procedures, access control measures, and environmental handling standards in line with Saudi industrial safety regulations.

Operational Standards

Our yard operates under structured material flow planning to ensure:

- Efficient loading and offloading
- Reduced operational risk
- Environmental protection
- Clean and organized workspace

Safety Policy

Safety is a fundamental pillar of our operational framework.

We maintain strict safety standards to ensure a secure working environment for our workforce, clients, and partners.

Our HSE Practices Include:

- Mandatory Personal Protective Equipment (PPE) for all personnel and visitors
- Controlled and supervised cutting procedures
- Safe loading, lifting, and material handling practices
- Designated work zones with access control measures
- Environmentally responsible recycling and waste handling approach
- Full compliance with applicable Saudi industrial and environmental regulations

We are committed to achieving zero-incident operations through continuous monitoring, workforce training, and ongoing safety improvement initiatives.

Al-Tawakkul for Scrap and Metal Est. possesses the operational capability to manage industrial scrap efficiently across collection, segregation, storage, and dispatch stages.

Our capabilities include:

- Organized yard layout with controlled material flow
- Skilled workforce trained in industrial scrap handling
- On-site segregation for ferrous and non-ferrous materials
- Safe loading, offloading, and transportation coordination
- Ability to support industrial shutdowns and dismantling projects
- Responsive service for factories, contractors, and oilfield-related operations

We are structured to deliver reliable, compliant, and timely scrap management solutions across the Eastern Province

Ferrous Scrap Handling

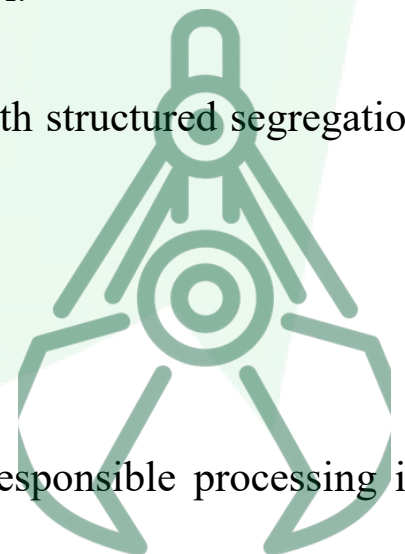

We specialize in the collection, segregation, and trading of various ferrous metal materials, including:

- Carbon steel scrap
- Structural steel scrap
- Oilfield piping scrap
- Heavy structural dismantling scrap
- Industrial surplus steel materials

All ferrous materials are handled, sorted, and stored in designated yard sections to ensure operational efficiency and quality control.

Non-Ferrous Scrap Handling

- Our non-ferrous division manages recyclable metals with structured segregation and handling procedures, including:
 - Copper scrap
 - Aluminum scrap
 - Brass scrap (Mao)
 - Stainless steel scrap
- We ensure proper classification and environmentally responsible processing in line with industrial standards.

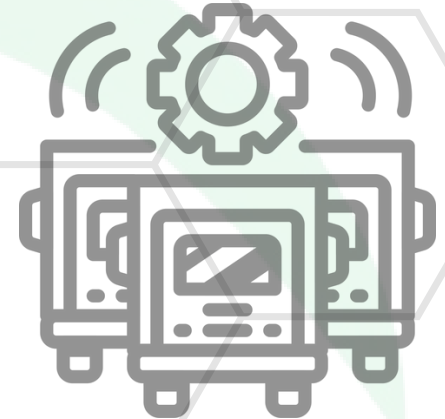

Fleet

Al Tawakkul for Scrap and Metal Est. maintains a reliable fleet and operational equipment to ensure safe, efficient, and timely scrap handling and transportation.

Transportation Fleet

- Flatbed trucks for bulk scrap transportation
- Tipper trucks for heavy scrap movement
- containers for logistic support
- Coordinated logistics support for industrial projects

Yard & Handling Equipment

- Forklifts for material handling and internal movement
- Heavy-duty loaders for bulk scrap management
- Weighing and segregation tools for controlled processing

Our fleet and equipment are maintained to support safe site operations, industrial shutdown projects, and continuous scrap collection activities across Saudi Arabia.

At Al Tawakkul for Scrap and Metal Est., quality control and regulatory compliance are integrated into all stages of our operations.

We Ensure :

- Accurate material classification and segregation
- Documented transactions and traceable scrap movement
- Compliance with MWAN and Saudi environmental regulations
- Controlled yard access and operational discipline
- Continuous process improvement and operational monitoring

Our structured approach guarantees reliability, transparency, and high quality performance in every transaction.

WHY CHOOSE US

At Al Tawakkul for Scrap and Metal Est., we position ourselves as a reliable industrial partner — not just a scrap trader.

What Sets Us Apart:

- **Operational Discipline** – Structured yard management and controlled material flow
- **Regulatory Compliance** – Full adherence to Saudi environmental and industrial regulations
- **Safety Commitment** – Strong HSE culture with enforced PPE and safe work procedures
- **Efficient Turnaround** – Fast response and timely collection & dispatch
- **Transparent Transactions** – Clear documentation and professional communication

We aim to build long-term partnerships based on reliability, compliance, and operational excellence.
